

Empathy Map

Date	04 July 2026
Team ID	
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	4 Marks

Persona: Local Resident / Disaster Management Officer in a flood-prone region

SAYS	THINKS
I never know how much rain is 'too much' rain. The news warnings come too late to prepare. I wish there was a simple tool to check my risk instantly.	Will my area flood again this monsoon? Is it safe to travel or should I evacuate? How reliable is a computer-generated prediction?
DOES	FEELS
Checks weather news and social media during heavy rain. Contacts local authorities for flood updates. Prepares emergency kits only after visible flooding starts.	Anxious during monsoon season. Frustrated by delayed or vague warnings. Relieved when given clear, early information.
